

## Enabling Finance Through Technology

For more than 15 years, JDL Technologies has delivered innovative technology solutions to public and private businesses in Florida, including capital investment firms and financial consultants, wealth managers, banks and accounting firms.

By enabling financial services providers to stay connected and compliant, we help you deliver a wide range of services to Florida businesses and consumers.

### Helping You Meet Compliance Requirements

The Gramm-Leach-Bliley Act imposes data security requirements on financial services providers, and by extension certain of their business affiliates. The Safeguards Rule, for example, sets standards for implementing and maintaining reasonable administrative, technical and physical safeguards to protect the security, confidentiality and integrity of customer information.

JDL Technologies provides IT solutions that comply with the most stringent safeguards established by the GLBA as well as the Health Information Portability and Accountability Act (HIPAA). If you're unsure about your compliance, our Security Assessment will reveal the gaps and offer recommendations for addressing them.

"Before we decided to become a JDL TechWatch Managed IT Services client, we asked them to conduct a Network Security Assessment. We were impressed with the comprehensiveness and professionalism of the report and process.

Today, JDL manages our IT services. I am extremely pleased with the work, professionalism and exceptional service received from JDL—and, more importantly, from all of the employees of JDL. The choice to switch to JDL Technologies has proven to be the best IT decision for ARCA!"

*Indra Campbell, President and CEO  
ARCA Capital Investments*

### Delivering Any Technology You Need

Through robust partnerships with leaders like Cisco, Citrix, HP and VMware, as well as young innovators such as Aerohive, Axcient, Bradford Networks, Ruckus Wireless and Meru, JDL is able to choose from the very best options in designing solutions that are perfect for your firm.

Our flagship solution, JDL TechWatch Managed IT Services, has earned the prestigious Trustmark credential and the fierce loyalty of our clients.

### Technical Expertise

Clients choose us for our technical expertise, and stay with us for the same reason. Our engineers have more than 300 years of technical experience and over 135 professional certifications.

### Financial Strength and Stability

Since 1981 our parent company has enjoyed a solid financial track record in the technology space. Communications Systems Inc. (NASDAQ: JCS) employs more than 400 dedicated people, and posted 2013 revenues in excess of \$131 million. CSI is as committed to our success and growth as we are to yours.
