

Enabling Education Through Technology

For more than 15 years, JDL has delivered innovative technology solutions to Florida's public and private schools, from K-12 to higher education. In fact, our oldest and deepest roots are in education.

By enabling Florida's students to stay connected on campus and in the classroom, we help provide the skills they need to thrive in an ultra-connected world.

Enhanced Learning, Digital Books and BYOD

With the mandate to provide students with online learning options, the role of information technology in education is more vital than ever.

Wireless classrooms reflect the real world as students use laptops and tablets to access curricula, homework, exams and quizzes. The Bring Your Own Device (BYOD) movement that transformed business has taken hold in the classroom, and lends strong support to 1:1 and 2:1 initiatives.

Our Expertise Includes E-Rate

Not only is JDL EduTech expert in educational IT, including wireless and wired networking and BYOD enablement, we also have extensive experience in E-Rate and grant-funded projects and their unique budgetary and operational processes.

Delivering Any Technology You Need

Through proven partnerships with leaders like Cisco, Citrix, HP and VMware, as well as young innovators such as Aerohive, Axcient, Bradford Networks and Meru, JDL is able to choose from the very best options in designing solutions that are perfect for your school or district.

Financial Strength and Stability

Since 1981 our parent company has enjoyed a solid financial track record in the technology space. Communications Systems Inc. (NASDAQ: JCS) had revenues exceeding \$131 million in 2013, and CSI is as committed to our success as we are to yours.
